

MANY THANKS TO OUR REVIEWERS

Many thanks to our reviewers

High quality of published research cannot be achieved without high quality peer review of submitted manuscripts. Good reviews are critical, but also provide authors with constructive comments to make their manuscripts even better. As an editorial team, we are extremely grateful to all our colleagues who have volunteered their expertise

and have taken time out of their busy schedules to participate in the peer review for our journal. They helped us to make good editorial decisions and to safeguard the quality of the papers that were published in the past year. The names of all reviewers are listed on the next pages.

Abbade, Luciana	Bramer, Wichor	Dareng, Eileen
